EDITING A PAGE

The wiki can be very slow to refresh and show your changes – so please be patient!

Click the navigation link (on the left) to go to the page you want to edit. If this is your first time, try the **Sandbox** which is purely for practice. Click the on the **Edit This Page** button and wait for the screen to refresh. (Some of the main pages are locked and cannot be edited.)

The **Editing Toolbar** appears, giving you tools to make changes to the page.

Adding Text

Don't forget to click on the page where you want your typing to appear. Otherwise it will just go at the very top.

Click and type on the page. Use it like you would a word processor. If you want to format your text, highlight what you've typed and use the toolbar buttons.

Always click **Save** when you have finished, or **Cancel** if you don't want to keep your changes.
